

PC18 MUTI-FUNCTION SPRAYING MACHINE

Product Description

PC18 Muti-Function Spraying Machine has self-designed screw pump technology, support spraying cement mortar, gypsum, concrete and other building materials, greatly simplify the construction process, improve work efficiency, suitable for internal wall, external wall, equal flow work projects.

High Quality

Thickened hopper design, large capacity, smooth discharge, good spraying effect, long service life

Safety

Provide continuous and stable power, convey material and air together, pneumatic switch, convenient, wear-resistant, durable, high pressure resistance

High Efficiency

High power 9.2KW, pure copper torque motor, high-speed spraying, spray 200 square meters per hour

Intelligence

Two people can operate, reduce the intensity of manual feeding, no scaffolding, reduce the intensity and workload of workers

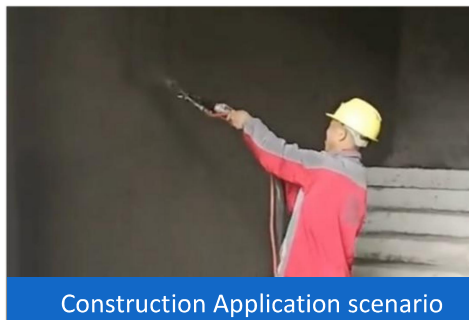

Parameter Indicators

Mode	PC18-Muti-Function Spraying Machine		
Voltage	380V	HopperCapacity	128L
Maximum orthopedic size	8MM	Flow	40L/min
AirCompressorPressure	Germany	Motor	9.2KW
Maximun Particle Size	8MM	TransportDistance	40M
Weight	210KG	Size	200*80*90CM
Maximum Working Pressure	70bar	After-sales Service	Warranty 1 Year
Scope of Application	Cement Mortar、Finished Mortar、Self-mixing Mortar、Lime Mortar、Clay Motor、Light or Heavy Gypsum、Thick fire prevention、Vitrified microbeads insulation particles、Elastic coating、 Real stone paint、Water in water、 Water in sand		

Engineering Application

Construction Application scenario

Construction Application scenario

Construction Application scenario

Supporting spraying cement mortar,gypsum,concrete and other building materials.It has been applied in many construction such as Hubei,Longnan in Gansu province,Zunyi in Guizhou.Greatly simplifies the work process,improve work efficiency,suitable for interior or exterior and self-flow equality projects.Related construction quality has been highly recognized by the project department and the construction team.
